

A MOTHERS DAY WISH

VERSE 1

That day on the altar, when we both said "I do"
We whispered to each other, three words "I Love you"
I should count myself lucky to have you as my wife
All that is missing now is children in our lives

CHORUS

For all the mothers and their daughters, fathers and their sons
The members of a family, together they work as one
From childhood to adulthood, our children are fully grown
Is time for them to leave the house, start a family of their own

VERSE 2

The first one to arrive was a little baby girl
They were so excited when she got her first curl
As the years went by, she looked just like her mother
She had the face of an angel, her smile was like no other

CHORUS

VERSE 3

They wanted to have a second child, a baby boy
The day finally came, he was a bundle of joy
Just like his father, he grew up handsome and strong
And women just loved him when he sang a love song
