

COLOURS OF THE NIGHT

You and me gonna set the night on fire
I feel a fire burning with pure desire
Gotta let it out now just can't keep it inside
When I am with you, I got nothing to hide

CHORUS

You and me, gonna break the night
With colour, yea, we're gonna do it right
Together we stand, nothing in our way
We'll face each other to the end of all days

We will take a chance and hope that it's right
From the sun in the morning to the stars at night
One star to another, wish on each in the sky
You never know how much, just give it a try

CHORUS

BRIDGE/MODULATION

The moonlit night is over, time to part
The time together, wish we were never apart
Until the next time we meet, keep me in your heart
We will begin again, for another start

CHORUS

ENDING
