

## LEAVES IN THE WIND

We have trouble seeing the bigger picture and thinking outside the box  
We often stop against the wind as we really don't want to walk  
Stuck in our own world, we can't accept and let go of the past  
Don't want to look forward into the future because the wind moves too fast

### CHORUS

Colours of the leaves present a new road to travel, don't ever look back  
The direction of the wind is constant even when the road is pitch black  
The path will be lighted for those who believe  
Changes that occur in life and the colours of the leaves

We are pieces of a puzzle that need to be arranged  
Colours of the leaves represent the different types of change  
We are leaves in the wind changing over time  
For it is only when life truly begins, there is a treasure we can find
