

STARS IN THE SKY

The sun from the east and setting to the west
From the rising of the sun to the sky above
The connection of two hearts wrapped in love
Their souls to merge and fly like a dove

CHORUS

When the stars come out at night
The light that they give, it burns so bright
I look up above and see each star shine
I could wish on each star and hope you were mine

The rising of the moon the setting of the sun
Fly to the stars above, count them one by one
My whole world changed on the day I met you
To have you by my side is a dream come true

CHORUS

BRIDGE

CHORUS
